Key Objects

Man-made objects consist of straight lines.

In nature objects are usually formed from wavy lines.

Key Skills

- I can bend, manipulate and join wire to create an object, such as a fish
- I can shape smaller pieces or wire to add features, such as ears, nose and a tail.
- I can blend tones gradually.
- I can improve my shading.

Key Facts

I know that the points, lines, shapes and space that make up simple 2D and 3D shapes are known as 'geometry'.

Key Vocabulary

3D form: Solid shapes which have three dimensions: height, length and width.

Facial features: Parts of the face, such as eyes, nose and mouth.

Geometric shapes: The simple 2D and 3D shapes that make up forms and objects.

Guidelines: Sketching lines and marks to help plan the scale and shape of the object you are drawing.

Shading: Using darker pencil marks to show the darker tones.

Sketching: A fast and light style of drawing which may not be completely accurate.

Template: A shape which can be drawn around.

Tones: The light and dark areas of an object or an art work.

Test Yourself

- What is a geometric design?
- What is sketching?
- What is a guideline?
- What is a template?
- How do we create gradual tones?
